

efka[®] - 2550

**Defoamer for water-based industrial coatings and pigment concentrates.
Excellent performance in high shear processing.**

Composition: modified polydimethyl siloxane

Data:

Active ingredients	: 95 - 100%	
Density at 20 °C	: 0.98 - 1.00 g/cm ³	DIN 51757
Flashpoint	: > 100 °C	ISO 3679
Appearance	: opalescent liquid	

Properties: EFKA-2550 can be used as a defoamer in various water-based coating systems and pigment concentrates. Due to its stability in high shear processing it functions well during the application of paints and lacquers. EFKA-2550 prevents the entrapment of air during processing steps such as grinding, stirring, pumping etc.

Application: EFKA-2550 has been developed for water-based industrial coatings and pigment concentrates.

Addition: 0.1 - 0.3% on total formulation

Incorporation: EFKA-2550 can be added in the grinding stage. If added to the finished product, care should be taken to ensure uniform distribution.

Storage: EFKA-2550 should be stored in a cool dry place. When kept in an original unopened container, it will keep up to 5 years from the date of manufacture. The expiry date is indicated on the container.

Packaging: 25 kg and 200 kg non-returnable containers
