

efka® - 3030

Additive designed to improve levelling and to increase scratch and abrasion resistance

Composition: Organically modified polysiloxane

Data:

Active ingredients	: 50 - 53 %	
Solvent	: isobutanol	
Density at 20 °C	: 0.90 - 0.92 g/cm ³	DIN 51757
Refractive index	: 1.418 - 1.428	DIN 53491
Flashpoint	: 27 °C	ISO 3679
Appearance	: clear, colourless liquid	

Properties: EFKA-3030:

- improves levelling
- increases scratch and abrasion resistance
- prevents floating
- improves anti-blocking characteristics
- compared to dimethylpolysiloxane, EFKA-3030 is universally compatible with various coating systems and does not cause cratering even in excessively high concentrations

Application: EFKA-3030 is used in water and solvent based industrial coatings, particularly for spray application.

Addition: 0.1 - 0.3% on total formulation

Incorporation: EFKA-3030 can be added at any stage during the production process. When added during the dispersion process, it speeds up wetting.

Storage: EFKA-3030 should be stored in a cool dry place. When kept in an original unopened container, it will keep up to 5 years from the date of manufacture. The expiry date is indicated on the container.

Packaging: 25 kg and 180 kg non-returnable containers
